# COACHING

At Junior Achievement, we believe in the power of coaching as a critical tool in developing the potential of young adults.

As a Coach you will have the opportunity to guide young adults toward meaningful and rewarding careers by offering practical advice and positive encouragement.

## JA Workforce Pathways Coaching Program

The JA Workforce Pathways program consists of 12 topics covering job readiness and financial literacy. Participants complete activities independently and work one-on-one with one of our coaches to review and discuss the material. Topics include:

- Identifying a career that aligns with interests, skills, and values
- Setting goals and creating an action plan
- Using tools and resources to explore careers, jobs, and education options
- Recognizing talents in the context of work
- Making the important career decision of *Employment First* or *Education First*
- Finding accurate information (research skills)
- Applying for employment or education opportunities
- Developing valuable communication skills
- Using transferable skills to manage time, make decisions, and communicate effectively

The program enhances the skillset and mindset of our participants and contributes to building a more equitable and skilled workforce.

*JA of WNY received additional funding from the NYS Office of Children and Family Services and the Erie County Youth Bureau.*
